		<p>Current medical practice and better diagnostic facilities result in very few clinicians opting for barium and IVP studies because of which investigations like Barium meal and IVP have now been superseded by CT scan and USG investigations. As a result the number of Barium studies and IVP on the day of the inspection were nil. However we do have other specialized X-Rays like mammography being done on a daily basis. On the dates of inspection (28 and 29th November, 2018) we had 5 and 8 mammography investigations respectively. (List for November attached herewith) Annexure IV</p> <p><u>Cytopath</u> Only the FNAC investigation was allowed to be included by the MCI inspector under the cytopathology column, which was nil on the day of the inspection (28/11/18). However, we beg to plead that Fluid and Pap smears are also considered cytopathological investigations, which we perform in considerable numbers daily. On the day of inspection (28/11/18), we had 20 tests under cytopathology, which included 5 fluid studies and 15 pap smears. We are attaching herewith the list of cytopathology investigations performed during the month of November 2018 in the hospital. Annexure V</p>	<p>On the date of assessment (11-4-2019). Total no. of cytopathology specimens received are 15 out of which 7 FNAC, 5 PAPS Smear tests, 3 fluid cytology tests.</p> <p>So deficiency rectified</p>
3	No ETO sterilizer	<p>Regret to inform that this was wrongly entered in the SA II form. We have an ETO sterilizer machine in the hospital which has been installed and in use, since the inception of the hospital (in 2015). We sincerely apologize for this oversight.</p>	<p>There is one ETO Sterilizer which is functioning. So deficiency rectified.</p>
